- A coaching philosophy that helps empower our clients
- Extensive Finance and Accounting industry expertise to align best practices with Host Analytics solution design and implementation
- Dedicated teams of Birst, Dell Boomi, Salesforce and cloud integration experts to complement Host Analytics solution design and architecture
- Award Winning Results: “Partner of the Year” and “Mentor of the Year” accolades

CLIENTS THAT RELY ON CERVELLO:

ADVISORY & CONSULTING

Our advisory & consulting services provide insight to help build your EPM roadmap and guide your journey.

Current State Assessment

We'll benchmark your current FP&A performance against industry best practices, perform a gap analysis and provide a prioritized report of recommendations.

Technology Selection

We can help with business case validation, cloud vs. on-premise selection and vendor selection analysis.

Big Data Analysis

We'll perform analysis of data sources that will enhance your financial planning processes in areas such as forecasting, modeling and scenario analysis.

Cloud Integration

We will provide recommendations on business data to integrate to enhance your planning processes.

SOLUTION IMPLEMENTATION

We provide a variety of services to ensure you're delighted with your selection of Host Analytics.

- ✓ Application Configuration
- ✓ Project/Process Manager
- ✓ Budget & Forecast Module
- ✓ Consolidation Module
- ✓ Revenue Planning Module
- ✓ Scorecard/Dashboard Module
- ✓ Cloud Integration
- ✓ Report Design & Development
- ✓ Financial Package Publisher
- ✓ Administrator & End User Training
- ✓ Spotlight
- ✓ Advanced Modeling

MANAGED SERVICES

Let your team focus on core competencies and fundamental finance activities by leaning on Cervello to optimize and evolve your Host Analytics solution as an extension of your team.

Administration & Basic Support

We'll monitor system performance, administer basic functions such as security, business rules and application processes and provide end user training.

Extension & Evolution

We can help evolve your application through: module expansion, budget process enhancements, report rationalization and optimization, advanced reporting, rolling/monthly forecasts, dimension/hierarchy changes and process changes (ERP, COA).
